## HELVAC DA

It vacuums packs any product introduced in a plastic bag and closes it inside the chamber with an aluminium clip.

By the sole introduction of the product in upright position inside the chamber, the HELVAC DA performs the entire vacuum packing process, the clipping and trimming of the excess bag material.

The full innovative system of the continuous-acting swing door allows placing a new product while the previous one is being vacuum packed, to automatically withdraw the finished product, and introduce the new one.

### Features:

- Robust construction and stainless components specially treated to withstand the adverse conditions such machines usually work in.
- Fully pneumatic operation.
- Minimum maintenance.
- Our firm provides lubricant ALB-591 in spray and in can, which meets all EU and USA demanded requirements for its use in the Food Industry.

Following our standards, its devices and elements are protected by our own patents. In order to improve the machine, we reserve the right of modifications without prior notice.

### Technical data:

Net weight:  
(without vacuum pump) 288 Kg  
Operating pressure: 6 bar  
Air consumption: 24 liters/cycle

Model	Range of clips
H-18	H-16, H-18, H-21

measures in mm
