

DAS

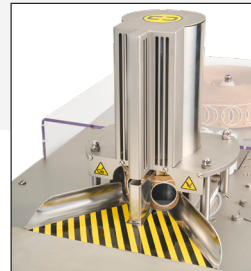

DAS

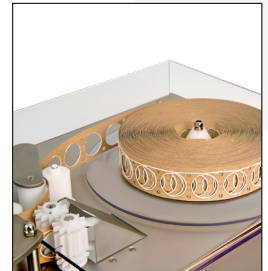

- Performs two simultaneous ties at each end, connecting them with a string while removing excess product (sarta).
- No aluminum clips - only string is used, achieving industrial-level production while preserving a handcrafted appearance.
- Robust construction using stainless steel materials with special treatments suited to the harsh conditions in which these machines typically operate.
- Highly ergonomic design with foot pedal activation, providing both ease of use and total operational safety.
- Pneumatic operation.
- Easy-to-access mechanisms for straightforward cleaning.
- Minimal maintenance required.

Safe and ergonomic foot pedal activation.

Maximum natural casing diameter: 38 mm.

Consumables available in different colours.
